Arizona Random Sampling Miscflag Explanation

The values for the random sample vehicle are 11 - 49. The first number is the test sequence that the vehicle was randomly selected, and the second number is the test sequence for the retest.

> **EXAMPLE:** If a vehicle is randomly selected during the first retest the miscflag is 22.   If the vehicle requires a second test, the miscflag would be 23. (Series number ends with "9" i.e., 19, 29, 39, 49. If further tests are required, the *9 flag is repeated).

The 40 series is for any vehicle we randomly selected for their fourth or greater test.

SERIES NUMBER	EXPLANATION
11	**Vehicle randomly selected in INITIAL test**
12	Vehicle 1st retest in INITIAL test process
13	Vehicle 2nd retest in INITIAL test process
22	**Vehicle randomly selected in SECOND test**
23	Vehicle 1st retest in SECOND test process
24	Vehicle 2nd retest in SECOND test process
33	**Vehicle randomly selected in THIRD test**
34	Vehicle 1st retest in THIRD test process
35	Vehicle 2nd retest in THIRD test process
44	**Vehicle randomly selected in FOURTH test**
45	Vehicle 1st retest in FOURTH test process
46	Vehicle 2nd retest FOURTH test process
